CANEXEL®

The Authentic

Here, it's CanExel®

In the countryside or the suburbs. For protecting, enhancing and improving your home. For beauty, durability and peace of mind. For more than 30 years, people here have chosen CanExel prefinished siding. The one. The only.

It integrates harmoniously with your environment and with virtually every architectural style, from traditional to modern. Its essence: its authenticity, its ability to make your house unlike any other – a place you want to come home to.

Authentic. Durable.

CanExel prefinished siding is produced from wood fiber, resin, and wax fused under pressure. This engineered wood siding is highly stable, as well as highly resistant to moisture. And it helps optimize our forests' yield.

Moreover, CanExel siding is finished in the plant, resulting in a durable, low maintenance product with all the beauty and nobility of wood.
